

Rob Snihur

Simulation mtg., Apr. 7, 2005.

Concatenation on-the-fly

Found & fixed more bugs, but it's **now ready to go!**

- Review
- New plans

Plans (from last time)

- Pick up 2 missing fixes (done)
- Add timing info (done)
- Port to latest cdfsoft2 version (done)
- Rerun stress tests (done/ongoing)
- Replace DFC tape logger with SamStore
- Full tests (write dummy datasets to permanent storage?) (to do?)

New Plans

- Generate real sample (jqcdci) at San Diego
 - Save concatenated output on disk at FNAL
 - Check output files
 - If OK, send to DFC
- Generate real sample and send output directly to DFC
- Run stress tests on other DCAFs & Toronto
- Replace DFC tape logger with SamStore
