

# QCD Agenda 11/22/02

---

## AGENDA

(Includes some topics that may be of interest to the Exotics Group)

1. Joey/Jay: News/Announcements (5')

### Run 1

2. Igor Gorelov: NLO 3-Jet Cross Section \*\*\*  
BLESSING \*\*\* (25')
3. Sasha Pronko: Charged Particle Multiplicities in Jets (20')

### Run 2

4. Yanwen Liu: Status of Run 2 Diphoton Cross Section (20')
5. Robert Harris: Dijet Mass Distribution (20')

# Announcements

---

1. Congratulations Mario! Mario is the new QCD convener.
2. No meeting next week. We will most likely be having an off-week QCD meeting on Dec. 6.

# CDF/D0 jet meeting

---

There will be a joint CDF/D0/theory jet meeting on Monday Dec. 16 from 9 AM-3 PM in One-West. We will take advantage of the presence that week of Zoltan Nagy to discuss evaluations of  $k_T$  jet cross sections. In addition, we will finalize the changes to the mid-point jet algorithm and discuss the implications of these changes (led by Steve Ellis). The meeting will also be carried by live-streaming.
