

Monitoring & Control Systems

- Long access starting 1600 tomorrow to fix problem in COT SL7 quadrant
 - **4 hours to pull east plug**
 - **2 hours to find and remove bad wire or plane**
 - **2 hours SVX checkout**
 - **15 minutes radiation device checkout (R. Tesarek)**
 - **Meanwhile, WHA PMTs fixed/replaced**
 - **4 hours to push east plug (but maybe delayed to morning for techs?)**
- Would like to get several MCS jobs in
 - **Test of CDF-CAP-MUON3 code (Yoeng Dae? Phil?)**
 - **Work on computer security patches/screensavers (Mark?)**
 - **Anything else?**
