

Postdoctoral Position in Experimental High-Energy Physics
University of Illinois at Urbana-Champaign

The experimental high-energy physics group at the University of Illinois has an opening for a postdoctoral Research Associate. The Illinois group is involved in the development of the front-end and data acquisition system for the Muon $g-2$ experiment under construction at Fermilab. We also continue to be active in CDF data analysis, with particular emphasis in electroweak, Higgs and b physics. It is envisioned that this position will work on Muon $g-2$ construction while carrying out analysis and producing publications on CDF data. Candidates must have a Ph.D. in Physics by the time of appointment and will be expected to play a leading role in our hardware responsibilities and in physics analysis. Candidates can apply online:

<https://my.physics.illinois.edu/submit/go.asp?id=551>

Applications received by November 30, 2012 will receive full consideration. Please contact Kevin Pitts (kpitts@illinois.edu) with questions.

The University of Illinois is an Affirmative Action/Equal Opportunity Employer
