

ICRB Meeting on GRID Plans

- Bring everybody up to date with what is going on
- Stimulate larger involvement and further thinking
- Listen with a question in mind:
Can we evolve to a “CDF Plan” ? Do we want/need to ?
- New question: How to incorporate computing contributions
 - A welcome addition ?
 - A help for offsite institutions ?
 - A solution to a problem ?
 - A money saving ?
- What problem do we really solve ? How does this help to produce physics ? What is gain/effort ratio ?

Agenda

- 4:00 generalities
 - 5min introduction Stefano Belforte
 - 10min tools for remote DH Jeff Tseng
 - 10min Evolving DB access for GRID Alan Sill
