Event Display status/plans

SVTD implementation in the Event Display is of high priority task(1st priority task at the moment).

➔***Status:***

- Henry J. Frisch request:
- x **SVT tracks adding** is in progress(pause was due to some SVTD format problems)

➔Problems

- The points I rise are
- ➔to make sure that the SVTD software is working standalone first
- ➔to understand what features of Event Display you would like to have for SVTD

➔***SVT plans:***

- x To complete **SVT tracks adding** task as soon as possible (first – "quick and dirty", to be sure we may get SVT tracks)

➔***My request to SVT Group:***

- x I need a small data (or/and with simulated events) file <=100 Mb which contains SVTD bank for testing (or any size file on **cdfpca**)
